

# Somar digital services

## Digital thinking creates human results

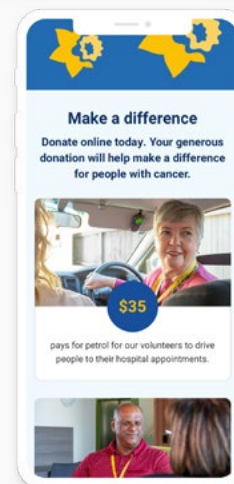

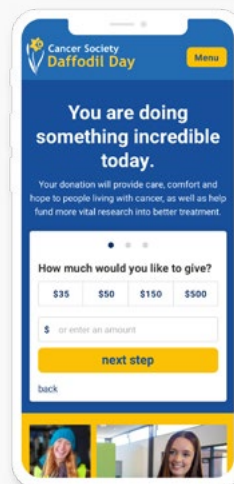

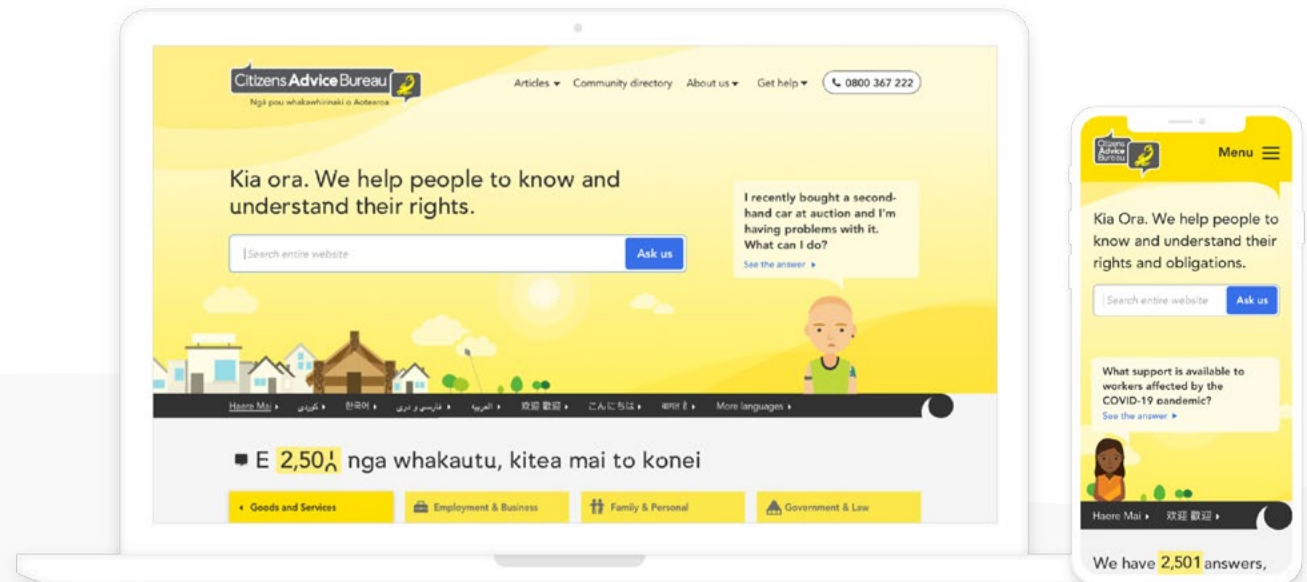

We are Somar Digital. Born in Wellington (2008) we help our partners get better human outcomes from their digital channels.

Many leaders know that digital experiences are driving customer / client relationships and organisational change. But getting to real results can be hard. Strategy, delivery, and reality don't always align.

We work with you and your team to solve that challenge together.

Somar provides a full suite of web services and design expertise, putting people at the heart of every digital experience. This includes user experience / user interface design, rapid development, customised Silverstripe solutions, cloud hosting + support, agile delivery and research workshops.

Our track record goes across major rollouts like the Metlink transport network and vital citizen services like Women's Refuge and the Cancer Society. Government agencies, not-for-profits and businesses choose to work with us because we listen, we get things done, and we put care into everything we do.

**We can help you shape better outcomes for your organisation and people.**

We'd love to get our heads together.
